

Sharmans Cross Junior School - Routes through calculation

Addition

Year 2/3	Year 4	Year 5	Year 6																			
<p>Examples of mental methods children should be using, supported by informal jottings.</p> <ul style="list-style-type: none"> Use of number line to support counting on.  <p style="text-align: center;">76 86 96 106 116 120 123</p> <ul style="list-style-type: none"> Encourage children to start with the larger number Use knowledge of bonds to 100 to make larger jumps. <p>Start at 76, partition 47 into 'manageable jumps'</p>  <p style="text-align: center;">76 80 100 120 123</p> <p>76 + 47 = 123</p> <ul style="list-style-type: none"> Leading onto  <p style="text-align: center;">76 116 123</p> <ul style="list-style-type: none"> Make links with number sentences (as shown below) where both numbers are partitioned. <p>76 + 47 70 + 6 + 40 + 7 70 + 40 + 6 + 7 110 + 13 123</p> <ul style="list-style-type: none"> The 'number sentence approach' will then lead into an expanded written method. Introduce the expanded layout for TU + TU, adding the tens first. <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">47 + 76 ----- 110 13 ----- 123</td> <td style="text-align: center;">67 + 24 ----- 80 11 ----- 91</td> <td style="text-align: center;">83 + 42 ----- 120 5 ----- 125</td> </tr> </table> <ul style="list-style-type: none"> Discuss how adding the units first gives the same answer, and practise this. 	47 + 76 ----- 110 13 ----- 123	67 + 24 ----- 80 11 ----- 91	83 + 42 ----- 120 5 ----- 125	<ul style="list-style-type: none"> Practise and consolidate addition of two 2-digit numbers using expanded written method. Extend to HTU + TU Continue to use the expanded layout for HTU + HTU, adding the units first. <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">368 + 493 ----- 11 150 700 ----- 861</td> <td style="text-align: center;">267 + 85 ----- 12 140 200 ----- 352</td> </tr> </table> <ul style="list-style-type: none"> Using similar methods, add several numbers with different numbers of digits. For example, find the total of: <p style="text-align: center;">83, 256, 4, 57</p> <p>Make links to compact method, using as appropriate to ability.</p> <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">47 + 26 ----- 13 60 ----- 73</td> <td style="text-align: center;">47 + 26 ----- 73</td> </tr> </table> <ul style="list-style-type: none"> Extend to decimals <p>Using methods similar to those above, begin to add two or more three – digit sums of money, with or without adjustment from the pence to the pounds. Know that decimal points should line up under each other, particularly when adding or subtracting mixed amounts such as £3.59 + 78p</p> <p>For example:</p> <p>£4.21 + £3.87 £2.24 + £5.23 + £1.36</p> <p>Extend to using decimals in context such as measure.</p>	368 + 493 ----- 11 150 700 ----- 861	267 + 85 ----- 12 140 200 ----- 352	47 + 26 ----- 13 60 ----- 73	47 + 26 ----- 73	<ul style="list-style-type: none"> Extend the expanded method to include addition of ThHTU + HTU + ThHTU +ThHTU eg. <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">7587 + 675 ----- 12 150 1100 7000 ----- 8262</td> <td style="font-size: 2em; vertical-align: middle;">}</td> <td style="vertical-align: middle;">Add mentally</td> </tr> </table> <ul style="list-style-type: none"> Extend method to numbers with at least four digits. Use similar methods; add several numbers with different numbers of digits. For example, find the total of: <p style="text-align: center;">58, 671, 9, 468, 2187</p> <ul style="list-style-type: none"> Continue to share compact method as appropriate to ability sharing how both methods relate to each other. <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">47 + 26 ----- 13 60 ----- 73</td> <td style="font-size: 2em; vertical-align: middle;">→</td> <td style="text-align: center;">47 + 26 ----- 73</td> </tr> </table> <ul style="list-style-type: none"> Extend to decimals <p>Using the chosen method, add two or more decimal fractions with up to three digits and the same number of decimal places. Know that decimal points should line up under each other, particularly when adding or subtracting mixed amounts such as 3.2m + 350cms. For example:</p> <p>£6.72 + £8.56 + £2.30 72.5km + 54.6km</p> <ul style="list-style-type: none"> Decimals in different contexts should be fed throughout the year and not just in the summer term 	7587 + 675 ----- 12 150 1100 7000 ----- 8262	}	Add mentally	47 + 26 ----- 13 60 ----- 73	→	47 + 26 ----- 73	<ul style="list-style-type: none"> Link the expanded method with the compact method first with no 'carries' and then with one 'carry' <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">47 + 26 ----- 13 60 ----- 73</td> <td style="font-size: 2em; vertical-align: middle;">→</td> <td style="text-align: center;">47 + 26 ----- 73</td> </tr> </table> <p>“7and 6 is 13, which is 10 and 3 units. 3 in the units and 1 ten in the tens column. 20 and 40 is 60; add the extra 10 which is 70. The answer is 73”</p> <ul style="list-style-type: none"> Extend the compact method to include TU + TU and HTU + HTU where ‘two carries’ are required, referring back to the expanded layout first. <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">47 + 76 ----- 123</td> <td style="text-align: center;">368 + 493 ----- 861</td> </tr> </table> <ul style="list-style-type: none"> If children are able, extend compact6 method to addition of ThHTU Extend method to numbers with any number of digits. Using similar methods, add several numbers with different numbers of digits. For example, find the total of: <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">42 6432 786 + 3 ----- 4681 11944</td> </tr> </table> <ul style="list-style-type: none"> Extend to decimals <p>Using the chosen method, add two or more decimal fractions with up to four digits and either one or two decimal places. Know that decimal points should line up under each other, particularly when adding or subtracting mixed amounts such as 14.5kg + 750g. For example:</p> <p style="text-align: center;">124.9 + 7.25 401.2 + 26.85 + 0.71</p>	47 + 26 ----- 13 60 ----- 73	→	47 + 26 ----- 73	47 + 76 ----- 123	368 + 493 ----- 861	42 6432 786 + 3 ----- 4681 11944
47 + 76 ----- 110 13 ----- 123	67 + 24 ----- 80 11 ----- 91	83 + 42 ----- 120 5 ----- 125																				
368 + 493 ----- 11 150 700 ----- 861	267 + 85 ----- 12 140 200 ----- 352																					
47 + 26 ----- 13 60 ----- 73	47 + 26 ----- 73																					
7587 + 675 ----- 12 150 1100 7000 ----- 8262	}	Add mentally																				
47 + 26 ----- 13 60 ----- 73	→	47 + 26 ----- 73																				
47 + 26 ----- 13 60 ----- 73	→	47 + 26 ----- 73																				
47 + 76 ----- 123	368 + 493 ----- 861																					
42 6432 786 + 3 ----- 4681 11944																						

Sharmans Cross Junior School - Routes through calculation

Subtraction

Year 2/3

- Use a number line to count on to find a difference.

e.g. $84 - 56$ $56 + 4 + 20 + 4 = 84$

- Use the zig-zag method to count on to find a difference.

e.g. $84 - 56$

$4 + 20 + 4 = 28$
Therefore... $84 - 56 = 28$

- Begin to record calculations in preparation for an efficient standard method.

↓ Beginning of expanded method

No exchange required

$$\begin{array}{r} 76 \\ - 42 \\ \hline \end{array} \quad \begin{array}{r} 70 + 6 \\ - 40 + 2 \\ \hline \end{array} = 34$$

Year 4

- Introduce the expanded layout for subtraction (HTU – HTU) using partitioning, where no exchange is required.

Example 1: 563 – 241

—	500	+	60	+	3
	200	+	40	+	1
	300	+	20	+	2

- Consolidate alongside compact efficient written method (column subtraction) using as appropriate to ability of two digit subtracting two digit numbers where no exchange is required as appropriate to ability.

	63
-	41
	22

- Extend the expanded layout (HTU – HTU) where one exchange is required. Adjustments between T and U, or adjustments between H and T.

Example 2: 563 – 248

—	500	+	60	+	3
	200	+	40	+	8
	300	+	10	+	5

- Begin to consolidate alongside compact efficient written method (column subtraction) which include exchanges using as appropriate to ability.

		5	13
	63		
-		48	
		15	

- Subtract numbers with different numbers of digits. For example, find the difference between:

671 and 58, 46 and 518

- Extend to decimals (these should be taught throughout the year). Using methods similar to those above, begin to find the difference between two three-digit sums of money, with or without 'adjustment' from the pence to the pounds. Know that decimal points should line up under each other.

Year 5

- Recap expanded method and compact method using as appropriate to ability. where one exchange is required (HTU – TU or HTU)

- Extend the expanded layout (HTU – HTU) where two exchanges are required.

		150	
	400	50	13
—	500	60	3
	200	70	8
	200	80	5

Continue using expanded method alongside compact method as appropriate to ability with ThHTU

- Subtract numbers with different numbers of digits. For example, find the difference between:

764 and 5821, 4567 and 893

- Extend to decimals using both expanded and compact method as appropriate to ability.

Using the chosen method, find the difference between two decimal fractions with up to three digits and the same number of decimal places. Know that decimal points should line up under each other. For example:

$£9.42 - 6.78$
 $72.5 \text{ km} - 4.6 \text{ km}$

Year 6

- Practise and consolidate use of compact method alongside expanded method as appropriate to ability for subtraction involving ThHTU, larger numbers and decimals.

			5	13			4	15	13
	563		563				663		
-	241		- 248			-	278		
	322		315				285		

- Subtract numbers with different numbers of digits. For example, find the difference between:

782 and 4387

- Extend to decimals

Using the chosen method, subtract two or more decimal fractions with up to three digits and either one or two decimal places. Know that decimal points should line up under each other. For example:

$324.9 - 7.25$
 $14.24 - 8.7$

Sharmans Cross Junior School - Routes through calculation

Division			
Year 3	Year 4	Year 5	Year 6
<ul style="list-style-type: none"> Continue to give children experience sharing using practical apparatus (leads into fractions) <p>E.g. '12 sweets ÷ 3 one for you, one for you...'</p> <p>12 ÷ 3 = </p> <ul style="list-style-type: none"> Teach how to find answers to divisions using grouping e.g. counting up in multiples of the divisor. To calculate 12 ÷ 3, empty number lines or counting sticks could be used to provide this visual image:  <ul style="list-style-type: none"> Questions that could be asked include: <ul style="list-style-type: none"> How many 3s make 12? How many jumps of 3 to get to 12? Alternatively model with multilink cubes/counters etc, taking away groups of 3 at a time Show how these practical methods can be recorded using the vertical expanded layout for short division. $ \begin{array}{r} 12 \div 3 \qquad 12 \\ \underline{- 3} \quad (1 \times 3) \\ 9 \\ \underline{- 3} \quad (1 \times 3) \\ 6 \\ \underline{- 3} \quad (1 \times 3) \\ 3 \\ \underline{- 3} \quad (1 \times 3) \\ 0 \end{array} $ <ul style="list-style-type: none"> Develop the idea of division as repeated Subtraction – 'Chunking' Begin to find remainders after simple division E.g. 17 ÷ 3 = 5 rem 2 	<ul style="list-style-type: none"> Explain that subtracting the divisor repeatedly can be inefficient when we move onto larger numbers. It is easier to start taking away 'chunks' of the divisor. Get the children to brainstorm chunks they know first to develop a bank of known or derived facts to work from, E.g. 5 x 5 = 25, 10 x 5 = 50 etc $ \begin{array}{r} 72 \\ \underline{- 50} \quad (10 \times 5) \\ 22 \\ \underline{- 20} \quad (4 \times 5) \\ 2 \end{array} $ <p style="text-align: center;">Answer: 14 remainder 2</p> <ul style="list-style-type: none"> Encourage the children to estimate the answer first. For example, 72 ÷ 5 lies between 50 ÷ 5 = 10 and 100 ÷ 5 = 20 	<p>Extend short division to include HTU ÷ U, subtracting 10th multiple of the divisor first.</p> <ul style="list-style-type: none"> Begin to familiarise children with the notation used for division. Begin to record answers on top of division notation Extend short divisions tackled to include HTU ÷ U, subtracting the 10th multiple of the divisor first. $ \begin{array}{r} 6 \overline{) 196} \quad r 4 \\ \underline{- 120} \quad (6 \times 10) \\ 76 \\ \underline{- 60} \quad (6 \times 10) \\ 16 \\ \underline{- 12} \quad (6 \times 2) \\ 4 \end{array} $ <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p>10 groups of 6 is formally recorded as 6 x 10</p> <p>However, children may record this as 10 x 6</p> <p>Provided they have a firm understanding of the procedure</p> </div> <ul style="list-style-type: none"> Extend short division to taking away larger chunks. $ \begin{array}{r} 6 \overline{) 32} \quad r 4 \\ \underline{- 180} \quad (6 \times 30) \\ 16 \\ \underline{- 12} \quad (6 \times 2) \\ 4 \end{array} $ <ul style="list-style-type: none"> Encourage children to estimate answers first. Get the children to brainstorm chunks they know first to develop a bank of known or derived facts to work from. E.g. 10 x 5 = 50, therefore 20 x 5 = 100 	<ul style="list-style-type: none"> Introduce long division (HTU ÷ TU) Encourage children to estimate answers first. Get the children to brainstorm chunks they know first to develop a bank of known or derived facts to work from. $ \begin{array}{r} 36 \overline{) 972} \quad \begin{array}{l} (20 \\ \times \\ 36) \end{array} \\ \underline{- 720} \\ 252 \\ \underline{- 252} \quad (7 \times 36) \\ 0 \end{array} \qquad \begin{array}{r} 36 \overline{) 972} \\ \underline{- 720} \\ 252 \\ \underline{- 252} \\ 0 \end{array} $ <ul style="list-style-type: none"> To assist with calculation, encourage children to use written methods for multiplication where appropriate. Extend to decimals. <p>Extend to decimals with up to two decimal places. Approximate first. Know that decimal points should line up under each other</p> <p style="text-align: center;">87.5 ÷ 7 is approximately 80 ÷ 8 = 10</p> $ \begin{array}{r} 7 \overline{) 87.5} \\ \underline{- 70.0} \quad (10 \times 7) \\ 17.5 \\ \underline{- 14} \quad (2 \times 7) \\ 3.5 \\ \underline{- 3.5} \quad (0.5 \times 7) \\ 0.0 \end{array} $
